Engineering Change Notice	**#: DST-10055E** **Date: 5 Oct 2015** **Approved by: T.Kawano–Quality Assurance** **Issued by: Tak Inoue – International Sales**	
Product	**Copyboard**	**Model**	**N-20 series,M-17,M-18,** **NF-20,N-31 series**

Change	**Copyboard Connect (USB control software) ver.1.0.5.1 release**
Reasons	**To realize PC control over copyboard via USB cable**
Schedule	**By this release of software**
Methods	**Distribution limited to contents server download for dealers**

［**Details of the change**］

To realize PC control over copyboard via USB cable, we will release first version of Copyboard Connect Software for dealers.

This App will realize copyboard control from the PC connected via USB cable like the previous M12 series.

Once installed, the scanned file from the PC using USB cable will be automatically stored to the PC while currently it must be saved manually.

This App realizes following functions.

1. Scan the copyboard from the PC via USB cable.
2. Feed/Stop the copyboard from the PC via USB cable.
3. JPEG/PNG/PDF file storage selection on the App. (If the copyboard file setting is selected as JPEG, and if PNG/PDF is selected on the App to save the file, the image quality is no more than JPEG quality as the App only converts JPEG file into PNG/PDF format.

Applicable for:

N-31S / N-31W / N-314
N-20S / N-20W / N-204 / N-20J / NF-20
M-18S / M-18W / M-17S / M-17W
